Science, Society, and Self provides opportunities for students to reflect on their time at MSU, prepares students for the next steps in life, and challenges students to apply HPS and STEM training to respond to concerns they identify. The course weaves together (1) a research group focused on topics selected by students, (2) a series of personal and professional development challenges, and (3) a portfolio of individually selected projects.

**Course Prerequisite:** Completion of, or concurrent LB32XA & LB32XB
